👤 Profile

I build the workflow-automation backbone (Zapier, Make, Salesforce, HubSpot, Zoho) that lets businesses scale customer messaging without manual handoffs. Full-Stack Developer at **QuantumStack**, shipping production messaging platforms and e-commerce sites across the **MERN stack** on **AWS infrastructure** (Lambda, EC2, CloudFront, Docker). Currently powering myCRMSIM, a production messaging platform with WhatsApp and iMessage integration, and Serenabeds.ie, a live e-commerce store serving customers in Ireland.

🛠️ Work Experience

Full-Stack Developer

Feb 2026 – Present

QuantumStack

Full-time

- Architected and shipped **myCRMSIM**, a production messaging platform powering WhatsApp and iMessage SMS for customer-support teams. Built the dashboard UI, SSO authentication, and 40+ admin API endpoints handling user, role, and integration management.
- Delivered **Serenabeds.ie** e-commerce platform end-to-end (frontend, backend, REST APIs, MongoDB schema), serving customers in Ireland with Lighthouse 95+ scores and sub-200ms API response under production load.
- Engineered workflow automations on **AWS** (Lambda, EC2, CloudFront, Docker) connecting client apps to Zapier, Make, Salesforce, HubSpot, and Zoho. Inbound webhooks fire automated actions like Send SMS, push notifications, and CRM updates, processing thousands of events daily.

🔧 Technical Skills

Languages	JavaScript, TypeScript, Python, Java, C++, SQL
Frontend	React, Next.js, Tailwind CSS, Framer Motion, Redux, React Query, shaden/ui
Backend	Node.js, Express, Python (FastAPI, Django, Flask), REST APIs, GraphQL, JWT, SSO
Databases	MongoDB, PostgreSQL, MySQL, Firebase, Redis
Cloud & DevOps	AWS Lambda, AWS EC2, CloudFront, Docker, Git / GitHub, CI/CD, Vercel
Integrations	Zapier, Make (Integromat), Salesforce, HubSpot, Zoho, Webhooks, SMS Workflows

🔥 Featured Projects

myCRMSIM | Production Messaging Platform

mycrmsim.com

- Built the dashboard UI, SSO authentication, and 40+ admin API endpoints handling user, role, and integration management.
- Integrated WhatsApp and iMessage SMS channels with webhook-driven inbound triggers, so customer messages automatically fire CRM-update actions in real time.

Stack: React · Node.js · Express · MongoDB · SSO · WhatsApp API

Serenabeds | Production E-Commerce Platform, Ireland

serenabeds.ie

- End-to-end ownership across frontend, backend, REST API architecture, and database schema design.
- Lighthouse 95+ across all metrics, fully responsive, sub-200ms API response, with JWT-authenticated secure checkout flow.

Stack: React · Next.js · Node.js · MongoDB · REST APIs · Tailwind

🎓 Education

★ **Triple Track:** pursuing three disciplines in parallel. A CS degree, a 5-year religious scholarship, and a full-time IT role. Time management and discipline are core competencies.

BS (Hons) in Computer Science

2022 – 2026

Virtual University of Pakistan

Coursework: Programming Fundamentals, Web Development, OOP, Data Structures, Artificial Intelligence.

★ Leadership & Extracurricular

- **Motivational Speaker:** 2+ years of public talks on discipline, self-learning, and career growth.
- **Avid Reader:** 30,000+ pages read across philosophy, self-development, and technical topics.
- **Public Speaking:** 5 years of continuous Darse Nizami training in rhetoric and communication.
